SET 26 – C Programming Language

(User Defined Functions)

1. Write a program to find sum of two integers for function with arguments and with returning values.
2. Write a program to find sum of two integers for function with arguments and without returning values.
3. Write a program to find sum of two integers for function without arguments and with returning values.
4. Write a program to find sum of two integers for function without arguments and without returning values.
5. Write a program to find the sum of digits of a number.
6. Write a program to check whether given number is prime or not.
7. Write a program to find sum of number up to n which are divisible by 9 and not by 6.
8. Write a program to find the Reverse of a Number.
9. Write a Program to get the average of 3 Integers.
10. Write a program to find number of years at which population of country gets doubled for given rate of growth.
